SOITEC REPORTS FY’24 FIRST QUARTER REVENUE

- Q1’24 revenue was at €157m, down 23% on a reported basis and down 24% at constant exchange rates and perimeter versus Q1’23
- Automotive & Industrial revenue continued to deliver sharp growth whilst Smart devices maintained double digit growth
- As anticipated, Mobile communications revenue were affected by the ongoing inventory correction across the smartphone market supply chain
- FY’24 guidance confirmed, with annual revenue expected to be stable year on year at constant exchange rates and perimeter, including H1’24 to decline by around 15%, and EBITDA\(^1\) margin\(^2\) expected to remain at around 36%

Bernin (Grenoble), France, July 25\(^{th}\), 2023 – Soitec (Euronext Paris), a world leader in the design and manufacture of innovative semiconductor materials, today announces consolidated revenue of 157 million Euros for the first quarter of FY’24 (ended June 30\(^{th}\), 2023), down 23% on a reported basis compared with 203 million Euros achieved in the first quarter of FY’23.

Pierre Barnabé, Soitec’s CEO, commented: “As expected, in the first fiscal quarter, we faced a global smartphone market slowdown, combined with significant customer inventories absorption. Q1’24 marks the bottom, and we are anticipating a strong H2’24 recovery.

In Mobile Communications, we continue to benefit from the growing penetration of 5G handsets and the growth of RF-SOI content into smartphones. Additionally, we are excited with the increasing adoption of FD-SOI and POI in the wireless market.

---

1 The EBITDA represents operating income (EBIT) before depreciation, amortization, impairment of non-current assets, non-cash items relating to share-based payments, provisions for impairment of current assets and for contingencies and expenses, and disposals gains and losses. This alternative indicator of performance is a non-IFRS quantitative measure used to measure the company’s ability to generate cash from its operating activities. EBITDA is not defined by an IFRS standard and must not be considered an alternative to any other financial indicator

2 EBITDA margin = EBITDA from continuing operations / Revenue
Meanwhile, in the Automotive & Industrial markets, our Power-SOI and FD-SOI product lines continue to perform very well, driven by the increasing demand for digitalization and electrification.

Our Smart devices revenue also shows a positive trend, thanks to the increased adoption of our product portfolio, for low power MCUs, edge AI, etc.

We remain confident that FY’24 will show continuous quarter on quarter growth, and maintain both our revenue and EBITDA margin guidance for FY’24.”

Soitec revenue was at 157 million Euros in the first quarter of FY’24, a 24% decrease at constant exchange rates and perimeter compared to the first quarter of FY’23. This is reflecting contrasted performances between our three end markets. Decline in Mobile communications revenue has partially been compensated by the sustained growth of Automotive & Industrial and Smart devices revenue.

**Mobile communications**

In the first quarter of FY’24, Mobile communications revenue reached 89 million Euros, a 43% decline at constant exchange rates compared to the first quarter of FY’23. This temporary drop in revenue, which is essentially reflecting a decrease in volumes, is due to a well-anticipated RF-SOI wafers inventory absorption by Soitec customers in the context of weaker smartphone sales across the world. As indicated by Soitec early April 2023, and confirmed at its Capital Markets Day in June 2023, this inventory correction is expected to last another quarter before growth in RF-SOI wafer sales resumes. RF-SOI will continue to be supported by a greater penetration of high-end smartphones with further adoption of 5G and Wi-Fi 6/6E/7 leading to a higher content of Soitec substrates per smartphone, but also by the deployment of 5G infrastructure.

---

3 There was no scope effect in Q1’24
Sales of **FD-SOI wafers** dedicated to front end modules continued to benefit from a positive momentum.

Sales of **POI (Piezoelectric-on-Insulator) wafers** dedicated to RF filters for 5G smartphones become a solid growth driver compared to FY’23. In addition, Soitec continues working with several customers on qualifying different design architectures.

**Automotive & Industrial**

Automotive & Industrial revenue reached 37 million Euros in the first quarter of FY’24, a 57% growth at constant exchange rates compared to the first quarter of FY’23. Growth essentially reflects a strong increase in volumes and, to a lesser extent, a positive price / mix effect.

Sales to the automotive industry continue to be driven by the rise in semiconductor content embedded in the latest generations of vehicles, Soitec products addressing the rising demand for multimedia and infotainment, functional safety, autonomous and assisted driving, as well as engine electrification.

Sales of **Power-SOI wafers** significantly increased compared to the first quarter of FY’23.

Sales of **FD-SOI wafers** also reached a higher level than in the first quarter of FY’23.

In addition, Automotive & Industrial sales continue to benefit from Soitec’s **SmartSiC™** technology. Production ramp-up is expected in FY’25.

**Smart devices**

Smart devices revenue reached 31 million Euros in the first quarter of FY’24, a 10% increase at constant exchange rates compared to the first quarter of FY’23, reflecting mainly higher volumes.

Sales of products dedicated to Smart devices continue to be driven by more complex sensors, higher connectivity functionalities and embedded intelligence, leading to more powerful and efficient chips for Edge Artificial Intelligence, Image Sensors, and Data Centers that support the Cloud Infrastructure.

Sales of **FD-SOI wafers** were much higher than in the first quarter of FY’23, supported by structural demand for Edge Computing devices across consumer and industrial sectors.

Sales of **Photonics-SOI wafers**, providing high speed connectivity solutions for Artificial Intelligence in the Cloud, and sales of **Imager-SOI wafers** for 3D imaging applications, were both lower than in the first quarter of FY’23.
FY’24 outlook

Soitec confirms expecting FY’24 total revenue to be stable at constant exchange rates and perimeter as compared to FY’23 with H1’24 total revenue to decline by around -15% year-on-year. The strong inventory correction which was anticipated for products dedicated to smartphones radiofrequency applications did materialize in Q1’24 and should last another quarter before a strong acceleration expected in the second part of FY’24. On the other hand, strong demand continues to be expected throughout FY’24 for both Automotive & Industrial and Smart devices.

Soitec also confirms FY’24 EBITDA margin to remain around 36%.

Analysts conference call to be held in English on Wednesday 26th July at 8:00 am CET.

About Soitec

Soitec (Euronext - Tech Leaders), a world leader in innovative semiconductor materials, has been developing cutting-edge products delivering both technological performance and energy efficiency for over 30 years. From its global headquarters in France, Soitec is expanding internationally with its unique solutions, and generated sales of 1.1 billion Euros in fiscal year 2022-2023. Soitec occupies a key position in the semiconductor value chain, serving three main strategic markets: mobile communications, automotive and industrial, and smart devices. The company relies on the talent and diversity of its 2,100 employees, representing 50 different nationalities, working at its sites in Europe, the United States and Asia. Soitec has registered over 4,000 patents.

Soitec, SmartSiC™ and Smart Cut™ are registered trademarks of Soitec.

¹ At constant exchange rates and comparable scope of consolidation:

- In Q1'23, Q2'23 and Q3'23 the scope effect relating to the acquisition of NOVASIC, finalized on December 29, 2021, had no material impact on Soitec’s revenue.
- There was no scope effect in Q4’23, nor in Q1’24.
